Karur , TamilNadu, India

Profile Summary

AI & ML student with hands-on experience in software development and data analysis, skilled in Java, Python, and MySQL. Experienced in building full-stack applications and applying machine learning and analytical techniques to develop efficient, data-driven solutions, with a strong focus on problem-solving.

Professional Skill

- Excel, Power BI
 - HTML, CSS, JS, React
- C++, Python, Java
 - MySQL, Git & GitHub
 - Spring Boot, NetBeans

Soft Skill

- Problem Solving
 - Effective Communication
- Team Collaboration
 - Time Management & Adaptability

Education

Sri Krishna College of Technology

2023-2027

B.E. CSE (Artificial Intelligence & Machine Learning)

CGPA :- 8.26

Bharani Vidhyalaya

12 th - 90%

2023

10th - 95%

2021

Experience

Full Stack Developer Intern

Eduversity | 2024 – 2025 (3 Months)

Worked on full-stack application development, contributing to both frontend and backend features.

Projects

- **Bank Management Application** | Java, MySQL – Desktop banking system with secure login and transactions.
- **Quiz Management Application** | Full Stack – Quiz creation, management, and automated evaluation.
- **DocuNest – Secure Document Vault** | Full Stack – Secure document storage with authentication
- **Project Management System** | Full Stack – Project suggestions, task tracking, and notes management.
- **IntervYou – Interview Preparation App** | Application Development – Interview prep platform for aptitude, technical, coding, GD, and HR rounds.
- **Emotion Detection System** | Python, CNN – Real-time facial emotion recognition using deep learning.
- **Fake News Detection System** | Python, NLP – NLP-based model to classify fake and real news articles.
- **AI Project Recommendation Engine** | ML – Recommends projects based on skills and domain.
- **Resume Screening System** | ML, NLP – Matches resumes with job descriptions using similarity analysis.

Certifications

- Cloud Computing – NPTEL
- Machine Learning – NPTEL
- Prompt Engineering – IBM, Coursera
- Data Visualization in Tableau – Coursera Project Network
- Prepare, Clean, Transform & Load Data using Power BI – Coursera
